Professional Certification Training Programs

PTCL Academy
Admission Open

CCNA (Routing & Switching)

Teaches comprehensive networking concepts, from network applications to the protocols and services provided to those applications by the lower layers of the network. Students will progress from basic networking to more complex enterprise and theoretical networking models.

CCCNA Cybersecurity Operations

Introduces the core security concepts and skills needed to monitor, detect, analyze and respond to cybercrime, cyberespionage, insider threats, advanced persistent threats, regulatory requirements, and other cybersecurity issues facing organizations. It emphasizes the practical application of the skills needed to maintain and ensure security operational readiness of secure networked systems.

Programming Essentials in Python

Covers all the basics of programming in Python, as well as general computer programming concepts and techniques. The course also familiarizes the student with the object-oriented approach.

Project Management Professional (PMP)

To gain and enhance knowledge to solve typical project management problems by following the principles of Project Management Body of Knowledge (PMBOK). PMP training at PTCL Academy Islamabad fulfils PMI's 35 contact hours of training requirements.
